ABSTRACT

This is a project describing the comptuation of truck reports.

1. INTRODUCTION

Here we say what this is all about.
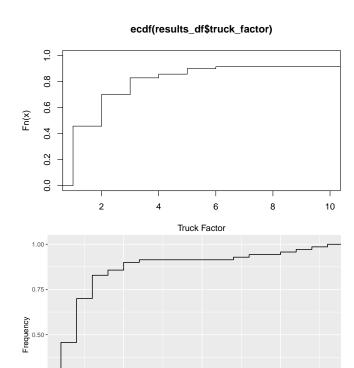

2. METHODS

Here we say how we did it.

431 commits, 273 unique files and 76 unique authors. I filtered the file types the same way Professor Vitek did in his report, keeping only files from known programming languages.

I only considered projects with more than 10 authors.

3. RESULTS

Here we say what we found.

45.7% of projects have tf 1
24.3% of projects have tf 2
12.9% of projects have tf 3
